Northeast Rehab Hospital Network

A Center of Rehabilitation Excellence

Make the
smart choice.

When a disabling injury or illness touches your life or the life of someone for whom you care, recovery becomes of prime concern. Since 1984, the staff at Northeast Rehabilitation Hospital Network (NRHN) has helped thousands of patients overcome their physical challenges and resume the activities and enjoyment of their daily lives at home or in the workplace.

Northeast Rehab is about continuity, activity, energy and teamwork. Our dynamic, 24 hour rehabilitation experience is powered by our highly qualified professional staff. Take a tour and meet our therapists, talk with our certified rehabilitation nurses and dedicated case managers to discover how deeply committed they are to helping patients achieve maximum recovery.

"The additional certification in Stroke Rehabilitation was a deciding factor in trusting Northeast Rehab to be a part of my wife's recovery."

Joe Racz, husband of Rebecca, a young stroke patient

Rehabilitation is about people connecting with people. It is actually a process of mutual inspiration. Our patients usually come to us in physical and emotional pain. There is nothing more rewarding to us than to see how quickly they respond to the support of nurses, therapists and the regular attention of their physicians.

The morale of our clinical staff is regularly boosted by the amazing feats of recovery and adaptation shown by our patients.

Take back your life.

Choose us.

We strive to offer the highest level of rehabilitation care through state-of-the-art and ever-improving practices. Our commitment to excellence is reflected in the talented staff who work with our patients through their recovery.

Our ability to offer a continuum of care which includes inpatient, home care and outpatient services supports our patients' progress toward recovery.

Choose expertise.

Our accreditation by The Joint Commission and The Commission of Accreditation of Rehabilitation Facilities is a testament to our adherence and dedication to the high standards of excellence in the areas of patient care, performance outcomes and national safety criteria.

As one of only a handful of organizations who have demonstrated a high level of commitment to providing expert stroke and brain injury rehabilitation, Northeast Rehab has achieved the distinction of Specialty Stroke and Brain Injury Certification from both The Joint Commission and Commission on Accreditation of Rehabilitation Facilities (CARF). These certifications are a clear sign that we are dedicated to providing the highest quality of care to our patients with use of only evidence proven therapies.

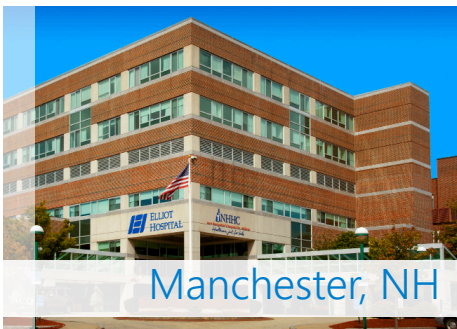

For those patients who have experience the loss of a limb, they can rest assured of superior care as we have been awarded a specialty certification in Amputee Rehabilitation from The Joint Commission.

Choose one network for all your rehabilitation needs.

Inpatient Hospitals

With acute rehab hospitals in Salem, Nashua, Portsmouth and Manchester NH, we are committed to providing services that excel in the provision of quality health care close to home for patients in need of specialty rehabilitation after injury or illness.

Services are provided to adults with a variety of diagnoses including but not limited to: neurological, musculoskeletal, orthopedic, pulmonary and cardiac conditions.

Home Care Services

Home care encompasses a wide range of services, including medical, nursing, social or therapeutic treatment and assistance with the essential activities of daily living. These services are delivered at home to individuals designated as "homebound" and require care from a skilled health care professional.

As hospital length of stay decreases, an increasing number of patients need highly skilled services when they return home and will benefit from our safe and effective care in the comfort of their own homes.

Choose Northeast Rehabilitation Hospital Network

Pain Management

At Northeast Rehab we understand the complex nature of pain. Our goal is to increase the patient's functional capacity while diminishing pain and its influence over daily activities. The physicians that treat our patients are affiliated with New England Neurological Associates, the largest neuroscience medical group practice in the eastern United States.

Outpatient Therapy

We offer outpatient programs at over 20 convenient locations in Southern New Hampshire, the New Hampshire Seacoast and Merrimack Valley. Our specialized services include programs for adult and pediatric orthopedic and neurological conditions. Highly trained physical, occupational and speech therapists work closely with the patient, their family and physician to provide a customized plan of care to maximize strength, endurance, mobility, communication, memory and functional abilities.

Pediatric Therapy

Our Department of Pediatrics offers a comprehensive array of home based, school based and outpatient rehabilitation services in New Hampshire and Massachusetts. We strive to meet the diverse needs of pediatric patients recovering from a wide variety of traumatic injuries, illnesses, developmental conditions and surgeries. The excellence in service provided by our specialty trained physical, occupational and speech therapists has resulted in high patient satisfaction and excellent outcomes. We offer cutting edge technology and specialty programs to our pediatric population including Bioness™, Lite Gait®, Aquatic Therapy, Adaptive Equipment, Mobility Park, Animal Facilitated Therapy and Specialty Physician Clinics.

We helped Lena put gardening back into her life.

Lena came to Northeast Rehab after surviving a traumatic brain injury resulting from a serious automobile accident. Her condition was further complicated when she had a stroke after the accident.

As part of her recovery plan, Lena participated in several of the special programs offered by our Therapeutic Recreation Department. Recreation therapists work with the patient to incorporate specific interests into therapy to achieve optimal outcomes that transfer to real life situations.

Lena and her therapists visited a local garden center. This out trip gave her the opportunity to get in and out of a car, navigate aisles of flowers, pay for a purchase at the register and manage her movement in the community. Lena once had a garden at her home where she grew her own fresh vegetables so this trip tapped into one of her existing hobbies. This trip helped boost Lena's confidence as she prepared for discharge at her highest possible level of independence.

We helped Sharon get back to her horse.

Sharon Woodbury came to us after surviving a stroke, which left her very weak on one side of her body and temporarily unable to live independently.

Sharon worked diligently with her rehab team to get back to her normal life, but one thing was still missing - her beloved horse, Booman.

As part of her therapy plan, Sharon was united with Booman during her stay with us. Traveling into the community to reach the barn and grooming and feeding her horse gave her the motivation to continue along her path to recovery. On her visit with Booman, Sharon said, "It was wonderful to see him. He's the therapy I need."
